

Alaska Influenza Report for the Week Ending June 16, 2018

This report provides a weekly snapshot of seasonal flu activity in Alaska. Additional information about influenza is available on the Section of Epidemiology's (SOE) influenza page: <http://dhss.alaska.gov/dph/Epi/id/Pages/influenza/fluinfo.aspx>. Please call 907-269-8000 with questions. Additional information about State Virology Lab findings and influenza microbiology is at <http://dhss.alaska.gov/dph/Labs/Pages/asvl.aspx>

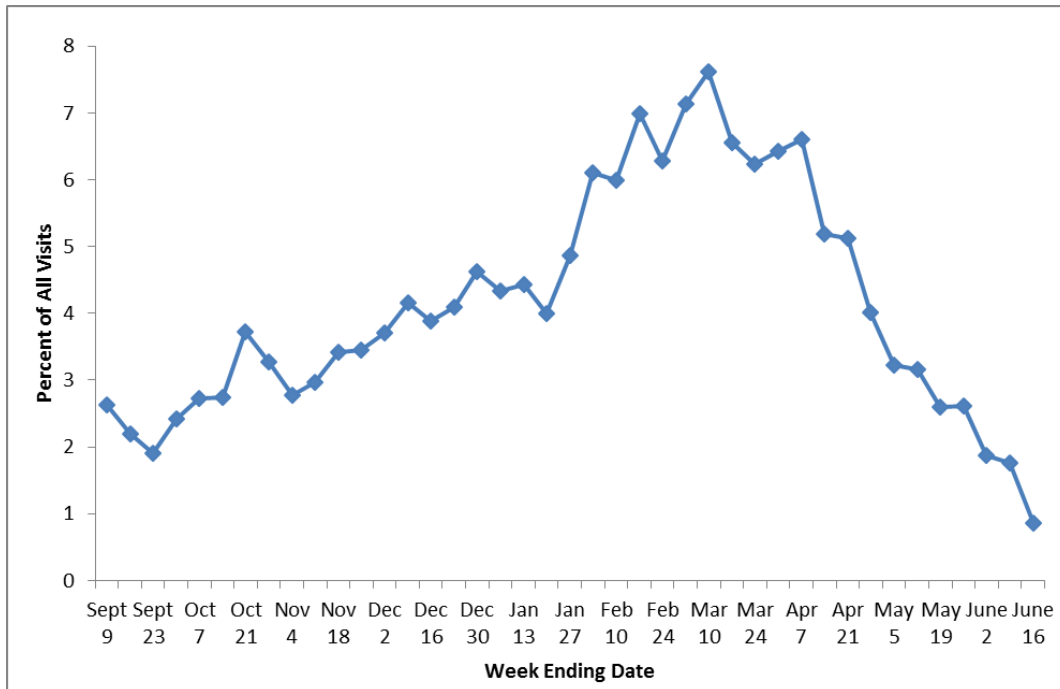

Statewide Lab-Confirmed Influenza: Current and Previous Seasons: Sep 9th, 2017-June 16th, 2018

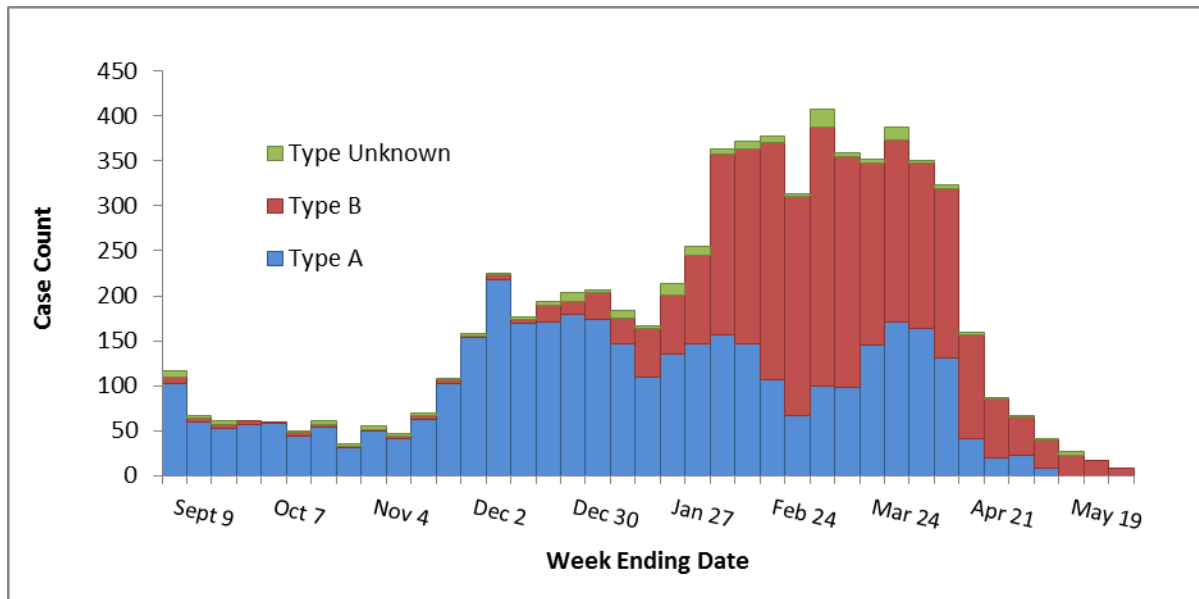

Lab-Confirmed Influenza (PCR or Rapid Test) Reported to the SOE by Region: Sep 9th, 2017 –June 16th, 2018

% of Visits for Influenza-like Illness (ILI) in Outpatient Settings in Alaska:
Sep 9th, 2017 – June 16th, 2018**

**Statewide Lab-Confirmed Influenza by Type:
Sep 9th, 2017- June 16th, 2018**

*A detailed review of CDC influenza surveillance indicators is available at: <http://www.cdc.gov/flu/weekly/overview.htm>

** Previously, primary care providers have voluntarily reported ILI data into CDC's ILINet program. This year, emergency room data from syndromic surveillance will also be reported to ILINet. This graph shows the proportion of all outpatient visits reported (from both primary care and emergency room settings) as Influenza-like illness. Syndromic Surveillance is a public health syndromic surveillance system that captures outpatient visits in certain Alaska facilities. For more information about Syndromic Surveillance please visit: http://dhss.alaska.gov/dph/Epi/id/Pages/synd_surv/default.aspx
